The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,25-32 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dunlap. Dunlap shows all the structure of the device as recited by the claims.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,25-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reiter et al in view of Dunlap. Reiter et al shows all the structures of the device as recited by the claims except the insert. It would have been obvious to provide the container of Reiter et al with an insert liner as taught by Dunlap in order to enhance the handling process.
